

An Environmental Affair

Volume 15 Issue 1

January 2004

The City of Los Angeles Environmental Affairs Department was established in 1990 to advise the city on environmental issues and provide a centralized source of environmental information. The Environmental Affairs Department seeks to protect and enhance the environmental quality of life for residents, workers and visitors in the City of Los Angeles.

City Wins Award from the 2003 State Energy Program

The Environmental Affairs Department, in partnership with the Bureau of Sanitation and General Services Department, is pleased to announce that the City of Los Angeles has won an award of \$150,000 from the United States Department of Energy through the 2003 State Energy Program. The City of Los Angeles South Los Angeles Refuse Collection Yard Natural Gas Infrastructure Project, located at 786 S. Mission Road, was selected to increase the availability of liquefied natural gas (LNG) and compressed natural gas (CNG) fueling facilities in the City.

One of the City's new LNG fueled refuse collection trucks

The City is committed to increasing the number of alternative-fuel vehicles in its fleet to help improve air quality in the Los Angeles region. Once built, the project is estimated to displace over 350,000 gallons of diesel fuel per year for the 100 heavy-duty refuse collection trucks serving the local area. The new alternative-fuel vehicles emit approximately half the amount of pollution as the equivalent diesel-fueled vehicles, which would mean a reduction of approximately 8.6 tons of pollution on an annual basis. The facility is expected to fuel 100 dual-fuel Bureau of Sanitation trucks per day. As other City departments add to their alternative-fuel fleets, the facility also will be available to them. It is anticipated that the facility will be completed in May 2005.

Recycle Your Christmas Tree *Recicle Su Arbol*

Please recycle your tree by cutting and placing it in your green yard trimmings container. If you are unable to use your green container, you may also recycle your tree by bringing it to one of the drop-off sites. Before recycling your tree, please remove all ornaments, decorations, tinsel and stand.

(Recycle...Continued on page 2)

En Español - Por favor recicle su árbol de Navidad con cortándolo y poniendolo en el bote verde. Si por alguna razón no puede ponerlo en su bote verde, tambien puede llevandolo alguno de los sitios de reciclamiento. Antes de reciclar su árbol, favor de quitarle todas las decoraciones y el estante. Los árboles dejados en las banquetas y callejones no serán recogidos. El Código Municipal 57.21.06 prohíbe que se tiren árboles en las calles debido o en las banquetas al peligro de incendio.

(Recicle...Continuó pagina 2)

An Environmental Affair is produced monthly by the EAD to inform residents about environmental issues and activities in Los Angeles. For questions, or to update or cancel your free subscription, call the Environmental Information Center Hotline at (213) 978-0888, send an e-mail to: eadinfo@mailbox.lacity.org, or visit our website at <http://www.lacity.org/ead>. TDD (213) 978-0899. You can also reach us by fax at (213) 978-0893. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities.

*Printed on recycled paper.

A Worldwide Approach The United Nations Environmental Program (UNEP)

Environmental problems do not respect political boundaries, they impact every citizen of the world. This is why the United States partners with the United Nations Environmental Program (UNEP) on many important programs. UNEP was established in 1972 to assess global environmental problems, strengthen existing institutions that protect the environment, and to facilitate the exchange of information on sustainable development. In September 2000, the United Nations adopted its millennium development goals that guide its activities for the next fifteen years: one of those eight goals is ensuring environmental sustainability, worldwide.

Environmental sustainability, the idea of using only as many resources as can be replaced and generating as much waste as can be naturally absorbed by the earth, is a priority for United Nations Secretary General Kofi Annan. Annan visited Los Angeles City Hall on December 3, 2003 to meet with City leaders and to give comments regarding a better world for our children at the City Council meeting.

He noted, "While today's major challenges are global, the impact is often felt most directly at the local level." He went on to explain, "cities demonstrate that what draws human beings together is far more important than what separates them."

UNEP helps cities worldwide with ways to grow food with fewer chemicals and water and still yield

(UNEP...Continued on page 3)

(Recycle...Continued from page 1)

Trees left at curbs or in alleys and streets cannot be collected. Per Los Angeles Municipal Code 57.21.06, it is illegal to leave trees at the curb or on street due to extreme fire hazard.

Trees can also be dropped off on January 3, 4, 10 and 11 from 9 am to 4 pm at certain locations (see below). Call (800) 5-TREE-56 for more information between December 1, 2003 and January 31, 2004.

Tambien pueden dejar sus árboles el 3, 4, 10 y 11 de enero desde las 9 am a las 4 pm en los sitios indicados (vea abajo).

(UNEP...Continued from page 2)

large harvests; it provides technical assistance on best management practices for land-use, water quality, waste management and coastal protection. Worldwide UNEP protects mammals and other species in the seas and oceans through the enforcement of worldwide no whaling and other agreements. It also tracks the release of toxic pollutants worldwide and works with industry to develop cleaner production processes. A large bulk of UNEP's work involves the monitoring and enforcement of international endangered species agreements. There are currently 5,483 species listed as threatened or endangered worldwide. UNEP staff worldwide monitor species survival levels, prevent illegal poaching and capture and work with zoos and refuges on repopulation programs.

Worldwide, one billion people live without safe drinking water and 2.4-billion lack adequate sanitation. By assisting countries with these problems, UNEP not only helps those needy people, but benefits more developed countries as well – quite simply polluted water runs to the oceans worldwide. Likewise, the release of toxic pollutants into our air impacts global climate change and air quality. Worldwide air pollution is estimated to cause five percent of all disease.

Additionally, UNEP, through the United Nations Framework Convention on Climate Change (UNFCCC) held a worldwide conference on air pollution and climate change from December 1 to 12, 2003 in Milan, Italy. The conference discussed technology that can be used to cut emissions as well as reforestation and other environmental enhancement programs. UNEP will hold its next annual Global Environment Forum from March 29 to 31 in 2004 on Jeju Island, South Korea.

The good news on the worldwide environment front is that we have the technology and foresight to protect and improve our environment now. The City of Los Angeles is doing its part by cutting emissions from its vehicle fleet, planting trees and gardens, working with businesses to prevent pollution and toxic release and is cleaning-up contaminated brownfield sites for a cleaner and more sustainable city. Every person on the planet can help by limiting their resource use, recycling, and limiting their use of pesticides and chemicals. For more information please visit www.unep.org and <http://www.ci.la.ca.us/sustainablela/>.

Student Pollution Prevention Research Grants Calling All Entries for Sustainability Projects

P3 is the United States Environmental Protection Agency's program to respond to the scientific and technical needs of the developed and developing world in moving toward sustainability. P3 refers to EPA's three components of sustainability: people, prosperity and planet. A P3 competition is scheduled to open in January for students attending colleges, universities and other post-secondary education institutions.

Up to 50 initial entries will be awarded up to \$10,000 to conduct an initial study of their sustainability project. Based on those studies, some projects will be fully funded during a later round of awards. The P3 Award is directed at undergraduate and/or graduate teams in colleges, universities, and other post-secondary institutions in the US. Challenges from a wide range of categories will be considered. These include, but are not limited to, water quality and quantity, energy production and distribution, green chemistry and engineering, biotechnology, conservation of materials and energy, product design, mobility, information technology, and delivery of resources (i.e., educational, medical, etc.). Challenges related to population growth and medical care are not included in this competition (other than the delivery or distribution systems of knowledge, goods and supplies).

Application forms and more information can be found at <http://es.epa.gov/ncer/p3/> or you may contact Eileen Sheehan at (415) 972-3287 or sheehan.eileen@epa.gov.

Visit <http://www.lacity.org/ead> for more grant opportunities.

Land Acquisition Program The State of California Wildlife Conservation Board (WCB) acquires real property or rights in real property on behalf of the Department of Fish and Game (DFG) and can also grant funds to other governmental entities or nonprofit organizations to acquire real property or rights in real property. All acquisitions are made on a "willing seller" basis pursuant to a fair market value appraisal as approved by the Department of General Services (DGS). The acquisition activities are carried out in conjunction with the Department of Fish and Game, with the DFG recommending priorities for proposed acquisitions. Following the DFG site evaluations, recommendations are submitted to the WCB for consideration for funding. Information is available through the Region 5 Headquarters of the WCB located in San Diego. For more information, contact the Region 5 headquarters at (858) 467-4201, or visit the WCB's Land Acquisition Program webpage at http://www.dfg.ca.gov/wcb/land_acquisition_program.htm.

NASA has launched the application season for its NASA Explorer Schools (NES) Program. Schools from across the country are eligible to apply online for an opportunity to partner with NASA in a program designed to bring engaging mathematics, science and technology learning to educators, students and families. During the commitment period, NASA will invite teams "back to school" at NASA Centers each summer in an effort to spark innovative science and mathematics instruction aimed at students in grades 4 through 9. While partnered with NASA, NES teams will acquire throughout the school year new teaching resources and technology tools using NASA's unique content, experts and other resources. NES schools receive grants of up to \$10,000 for technology tools that support science and mathematics curricula in the classroom. The deadline for submission of applications for the NES Program is **January 30, 2004**. For access to NES applications and information, and to view the list of NASA's first 50 Explorer Schools, visit <http://explorerschools.nasa.gov>. For information about NASA Education programs, visit <http://education.nasa.gov>.

The 2004 Toyota TAPESTRY program will award 50 grants of up to \$10,000 each and a

minimum of 20 "mini-grants" of \$2,500 each to K-12 science teachers. Interested teachers should propose innovative science projects that can be implemented in their school or school district over a one-year period. Toyota TAPESTRY projects demonstrate creativity, involve risk-taking, possess a visionary quality, and model a novel way of presenting science. The deadline for completed proposals is **January 16, 2004**. The program is open to all middle and high school science teachers who teach at least two science classes per day. The program is open to elementary teachers who teach some science in the classroom or as teaching specialists. To download an application and view more details about the grant, visit www.nsta.org/programs/tapestry; call the program's Fax on Demand service at 1-888-400-6782 and request document number 591 to receive an application; or write to Toyota TAPESTRY, c/o NSTA, 1840 Wilson Boulevard, Arlington, VA 22201-3000.

Environmental Protection Agency (EPA) SBIR PROGRAM EPA's Small Business Innovation Research (SBIR) Program provides financial support to help small science and technology based firms develop new environmental technologies and ready them for commercialization. The program targets research to prevent pollution, reduce water and air pollution, manage solid and hazardous wastes, and improve environmental monitoring – in each case, addressing priorities that are based on the Agency's Strategic Plan. In 2004, EPA will issue four Phase I Solicitations. There will be three special solicitations – Pacific Environmental Problems, Hazardous Waste Minimization and Pollution Prevention – and the regular SBIR Solicitation. **Phase 1 opens March 25, 2004. Closing date for Phase 1 is May 25, 2004.** For more information on the SBIR Program, visit <http://www.epa.gov/ncer/sbir>.

The Pew Charitable Trusts makes grants to qualified non-profit organizations that reduce the generation of greenhouse gases that contribute to global warming, conserve living marine resources with a particular emphasis on fisheries, and protect critical forest habitat and wilderness on public lands in North America. More information can be found at www.pewtrusts.com/grants/.

JANUARY CALENDAR OF EVENTS

EACH MONTH:

Hyperion Wastewater Treatment Plant Tours

Free public tours of the facility (located near El Segundo in Los Angeles) are available Tuesday, Wednesday and Thursday starting at 9 am. For more information, please contact Felcie Kidd at (310) 648-5363 for details or to schedule a tour.

Satwiwa Sundays From 11 am to 3 pm at Rancho Sierra Vista/Satwiwa. Meet guest hosts, watch demonstrations and share the experiences of the Native American LA Community. Sponsored by the Friends of Satwiwa and the National Park Service. For more information call the National Park Service at (805) 370-2301.

Amigos de Bolsa Chica offer free public tours of the wetlands for individuals the first Saturday of each month. Visitors who arrive between 9 and 10:30 am

will be led on a 1 1/2 hour tour which makes 5 stops along the walkbridge and loop trail. Trained tour guides discuss bird identification, ecology, endangered species, early history and current status. For more information, visit <http://www.amigosdebolsachica.org> or call (714) 840-1575.

Augustus F. Hawkins Natural Park offers youth activities including day-long trips to destinations like Point Mugu, Franklin Canyon and Malibu Creek. These trips are held each Saturday and transportation is provided. For information, please call (323) 585-3205.

Madrona Marsh Preserve in Torrance hosts a Tyke Hike for pre-school children and parents every first Thursday of the month. Suggested donation is \$5. For more information call (310) 32-MARSH.

Audubon Center at Debs Park hosts Saturday and Sunday nature activities and hikes for children and their parents. For more information call (323) 221-2255.

Garden Sprouts Saturday Kids Gardening Club at the Los Angeles Arboretum (Kids ages 5-8) .This is a "drop off" program where children can play nature games and learn how to garden. Reservations required. For registration information, contact the Education Department at the Los Angeles County Arboretum & Botanic Garden, located at 301 N. Baldwin Avenue in Arcadia at (626) 821-4624.

Monthly Beach Cleanup sponsored by Heal The Bay on the third Saturday (January 17th) in Marina del Rey. Meet in the parking lot at Pacific and 62nd at 10 am. For more information visit www.healthebay.org or call (310) 453-0395.

John Paul Getty Center offers daily tours of its four gardens including a discussion of native plants in design. Tours are Tuesday through Sunday at 11:30 am, 12:30 pm, 2:30 pm and 3:30 pm. For more information call (310) 440-7300 or visit www.getty.edu.

The EAD website, located at www.lacity.org/EAD, contains updated information on this month's events. To ensure your event is included in our monthly newsletter, submit information to the editor by the 10th of each month prior to publication. After the 10th, events can be entered into our website calendar only.

The EAD reserves the right to edit all submittals and does not necessarily endorse the events listed. All events are subject to change, so call listed event contacts to verify information.

THIS MONTH:

(EAD recommends contacting event sponsor prior to event)

All Month Long

Downtown on Ice Ice Skating at Downtown Pershing Square brought to you by the City of Los Angeles Department of Parks and Recreation. For more information visit www.laparks.org/pershingsquare/doi_info.htm or call (213) 847-4970.

Sat, Jan 10

Shoreline Park/Ocean Trails Walk A 2-hour walk crosses one of the few publicly owned parcels of coastal land in the South Bay with coastal bluff scrub habitat, as well as views of the Pacific. Participants can observe results of recent restoration efforts. Meet at 9 am. Park on La Rotunda, just west of the San Pedro border. Free. Sponsored by the Palos Verdes Peninsula Land Conservancy. For more info call the Conservancy at (310) 541-7613.

THIS MONTH CONTINUED:
(EAD recommends contacting event sponsor prior to event)

Sat, Jan 10

Taking It to the Streets The Long Beach Aquarium's Green Team will host a trash clean up in an urban area to raise the awareness of trash's impact on the environment and educate the public about the connection between trash entering gutters and ocean life. To volunteer, contact Zara Cadia at (562) 951-1613. The clean up takes place from 10 am to noon, location to be announced. Bags and gloves will be provided.

Sun, Jan 11

Whale Fiesta Join the Cabrillo Marine Aquarium in a celebration to kick-off of the whale watch season! In addition to the famous Duct Tape Whale Contest, they will have arts and crafts for children of all ages, talks by whale experts, and door prizes given away! The fiesta takes place from 10 am until 4:30 pm at Cabrillo Marine Aquarium located at 3720 Stephen White Drive in San Pedro. Admission to the event is free. Complimentary park and ride service is available. For more information, please call Larry Fukuhara at (310) 548-7562 ext. 5011, or visit the Aquarium's website at www.cabrilloaq.org.

Sat and Sun, Jan 17-18

Celebrate—Lunar New Year at the Los Angeles Zoo, this is the year of the monkey and the zoo will celebrate

with dance and martial arts performances, foods from across Asia, crafts projects and more for all ages. Free with Zoo admission. Call (323) 644-6400 or visit www.lazoo.org

Sun, Jan 18

Birding and Hiking at Ballona

Join Audubon Los Angeles at Ballona wetlands to see Surfbird, Black Oystercatcher, gulls and Large-billed Savannah Sparrow along the beautiful beach and wetlands. Meet at the Del Rey Lagoon parking lot at 8 am. For more information visit www.laaudubon.org or call (323) 876-0202. Free.

Sat, Jan 24

"Legends of Los Angeles" A theatrical living history for children that journeys from prehistoric Los Angeles into twenty-first century "L.A." by performance artist Janeece Flint. The event takes place at Central Library's Mark Taper Auditorium at 2 pm. Call LAPL for more info at (213) 228-700. Free.

Sat, Jan 24

Runyon Canyon Park Geology Walk Geologist-led walk covering five geologic formations and over 100 million years of history. Meet at North entrance, Mulholland Drive and Desmond Estates. The 2-hour walk begins at 9:30 am. Sponsored by the Friends of Runyon Canyon. For more information call (213) 666-5004. Free.

Fri and Sat, Jan 30 and 31

Winter Native Plant Sale The Theodore Payne Foundation holds their annual winter sale with discounts on plants. For more information, call the

Foundation at (818) 768-1802 or visit their website at www.theodorepayne.org. The Foundation is located at 10459 Tuxford Street in Sun Valley.

University of California Cooperative Extension Los Angeles

**Common Ground Garden Program
MASTER GARDENER VOLUNTEER
TRAINING PROGRAM**

Saturdays, March 6 – May 8, 2004

WHO CAN APPLY

- Any resident of Los Angeles County.
- Anyone who wants to help teach low- and limited-resource people how to grow and eat more nutritious vegetables and fruits.

WHAT THE PROGRAM ENTAILS

- Teach you how to garden successfully. Topics and garden activities will cover basic plant science, propagation, fertilization, irrigation, soil, compost, vegetable and herb and fruit gardening, simple and nutritious vegetable preparation and storage, flowering plants and trees, Integrated Pest Management (diseases, weeds, insects, small animals), tools, and how to create a community and school garden.
- Provide instruction in English and simultaneous translation into Spanish.
- Notify you by February 27 whether you've been accepted into the program.

QUIÉN PUEDE INSCRIBIRSE:

- Cualquier residente del Condado de Los Angeles.
- Quién desee ayudar a otras personas con ingresos limitados como cultivar y preparar verduras y frutas nutritivas.

QUE EL PROGRAMA ES

- Le notificamos a usted antes de 27 de Febrero si fue aceptado para el programa.
- Enseñarles como cultivar un jardín con éxito. Los temas y actividades del jardín que se cubrirán son lo básico de ciencias en plantas, propagación, fertilizantes, irrigación, suelo, el abono vegetal, el cultivo de verduras, frutas, y hierbas aromáticas, una manera nutritiva de preparar y almacenar sus verduras, plantas y árboles que florecen, Control de los Insectos y Enfermedades, las herramientas y como desarrollar un jardín comunitario y escolar.
- Proveer instrucción en Inglés y traducción simultánea en Español. Proveer a Ud. con las oportunidades voluntarias y educativas en el Condado de Los Angeles.

For an application packet and more information call (323) 260-3348, or e-mail Gloria Mitchell at gjmitche@ucdavis.edu.

Fuel Check for the City's Latest Alternative Fuel Vehicle

On December 2, 2002, the City of Los Angeles took delivery of the nation's first hydrogen fuel cell car certified for commercial use, the Honda FCX. The delivery of the vehicle marked the first of five to be leased to the City from Honda for a two-year period. In December 2003, the last of the five vehicles being leased to the City was delivered. The City's user experience and comments on the FCX performance and design were an integral part of Honda's testing and evaluation process. The feedback given by the City has resulted in some minor design reassessments.

Deputy Mayor Brian Williams, one of the primary drivers of the FCX over the last year, has expressed satisfaction and praise for the safety and reliability of the vehicle. Williams says he does feel very privileged to be able to drive the FCX, using it as a great conversation piece allowing him to educate others about zero-emissions technology. From the driver's perspective, he believes that hydrogen fuel is a great leap in engineering, similar to moving from propellers to jets.

The Honda FCX is powered by a hydrogen fuel cell that produces electricity onboard the vehicle. A fuel cell functions by combining compressed hydrogen (stored in a tank) with oxygen in the air to make electricity. The electricity is used to power the electric motor, which in turn propels the vehicle. The only exhaust emission is water vapor. Both the California Air Resources Board and the United States Environmental Protection Agency have certified the Honda FCX as a Zero Emission Vehicle and for every day commercial use.

Mark Barrera, GSD Automotive Dispatcher, oversees the use, dispatching, and general performance for the Honda FCXs that are housed in the garage at City Hall East. Over the last year, Barrera exhibited the vehicles at several events, including some school functions, the California Fuel Cell Partnership's "Rally Through the Valley" event in May 2003 (see the July 2003 issue of *An Environmental Affair*), and in an interview for a National Geographic television special on "green" cars.

Barrera says that some of the most common questions that people ask him about the FCX include: "Does it drive like a regular car? What is its range? How fast can it go? Do you have any safety concerns regarding the compressed hydrogen?" Barrera says that the vehicle handles just like a regular car and has good pick up; drivers average about 140 miles per tank (which holds 3.75 kilograms of hydrogen compressed to 5000 pounds per square inch); it has a maximum speed of 93 mph; and no, the design of the fuel tanks accounts for assuring the utmost safety, and every necessary precaution has been included in the design of the car.

FCX vehicles refuel. Refueling takes approximately five minutes.

Inside the hydrogen fueling station located at Beaudry and Second Streets near downtown Los Angeles. Hydrogen gas is stored in a series of twenty tanks at increasingly higher pressures.

For more information on the City of Los Angeles' fleet of alternative fuel vehicles (AFVs), visit the Environmental Affairs Department's website at <http://www.lacity.org/ead>, and click on "Alternative Fuel Vehicles," and Honda's FCX site at http://www.hondacorporate.com/enviro_n_tech/, and click on Fuel Cell Technology.

HOTLINE CONNECTION

The Environmental Information Center (EIC) serves as a referral source to the community. Our hotline connection offers a list of the most frequently requested numbers. If the number you need is not listed, please contact the EIC at **(213) 978-0888**, or toll-free in Los Angeles only at **(800) 439-4666**. You can also visit our website at <http://www.lacity.org/ead> and click on *Environmental Information Center*.
